

proSET General Meeting

Member Projects

25 October 2022

Projects of NSTF proSET member organisations

- Over the past seven years the proSET (Professionals in Science, Engineering and Technology) Committee has annually invested a portion of the proSET sector funds to support worthy member projects and activities.
- proSET is a sector of the National Science and Technology Forum (NSTF) representing Professional Bodies and Learned Societies.
- The NSTF secretariat serves the proSET sector, as well as the six other sectors of membership.
- The proSET funds are specifically reserved for projects managed by proSET members.

Conditions For Funding

Only organizations that are existing members of the NSTF under the proSET sector, can apply for project grants, subject to the following conditions:

- The organisation should be a paid-up member of NSTF in the proSET sector for the current year and previous years by the time of submitting a proposal
- The organisation should not be primarily funded by government or government agencies
- The organisation should be solvent and should have other sources of income besides proSET funding

Conditions for the proposed projects

- Related to sciences, engineering and/or technology (SET) and innovation, SET education (including maths education), promotion/raising awareness of SET, or SET-related training
- Already well established; or proposals linked to existing projects
- Projects that will have a multiplier effect, e.g. training trainers
- Projects that will have measurable outcomes, and that include plans to evaluate processes and outcomes
- Projects that promote ongoing professional development of individual members of *proSET* member organisations
- Projects that are innovative

A total of 33 grants have already been made to proSET organisations, proSET and NSTF projects during the past seven annual rounds.
